	Project:	West Basin MWD		
Drill and Construct 2 Monitoring wells 310 feet deep	Street Address:			
	City/State/Postal:	Redondo/ Hermosa Beach, CA		

Our bid is based on the following terms, assumptions, and conditions: Well development by others voids any guarantee and warrantee for well construction on labor or materials.

✓	wen development by others voids any guarantee and warrantee for wen construction on labor of materials.
4	Client or others are responsible for clearing all utilities, obtaining permits, easements, traffic control, and site preparation for access.
4	Water is available on or near the site.
	Boart Longyear standard pay rates apply (non union, non prevailing wage rates).
4	Locations are Truck accessible and others to perform site preparation. Access delays will be compensated at our standby rate.
V	Any applicable costs for permits, licenses, taxes, etc. will be charged at cost + 15%.
√	Our agreement is not a part of, nor is it subject to, any flow down or flow through provisions from any other contract.
V	Bid is based upon unconsolidated drilling. Bedrock drilling rates (if applicable) are to be negotiated.
V	Any IDW that needs to be disposed of off site is to be handled by others (including the decontamination pad).
4	If bid quantities for any task increase or decrease by over 25% as stated in the scope or proposal, prices are subject to renegotiation.
✓ ✓	This bid assumes there are no security concerns. If additional security is required, prices have to be negotiated. A decontamination pad is not required. Tooling will be decontaminated as it is being retracted from the boring it decontamination is required.
V	Decontamination is for down hole tools only. Our price is based on the rig to continue working while the tooling is decontaminated separately. If rig is required to be decontaminated it will be charged at our rig & crew standby rate.
V	Work to take place in normal level "D" working conditions. Additional charges may apply. Fees must be agreed upon in writing prior to doing any work at any other safety level.
V	Events that delay the drilling rig or equipment (i.e.: borehole logging, waiting for water levels, consultant water samples, hydration time, grout cure time, etc.) will be charged at standby / access delay rates.
V	Anything over 115% of material (sand, grout) in a calculated area will be billed at cost +15% on the material and the hourly standby rate for the rig & crew.
V	Bid is based on rig availability at the time of the award. We do not lock a rig into any schedule, or order project supplies, until we receive a purchase order or contract.
V	This bid is exclusive of any applicable state and local sales taxes as required by law.
